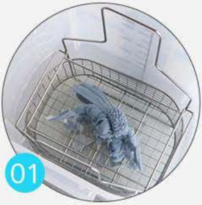
Washing Mode

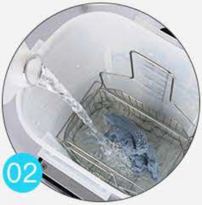
≚

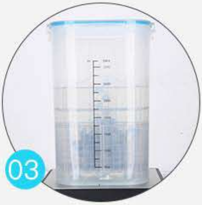
1 Versatile washing mode

A wide range of cleaning methods, compatible with most photon printing platforms, no need to remove the print from the platform to clean the print.

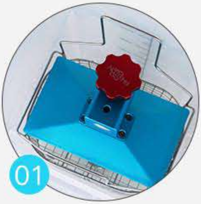
Put the model in the basket to wash

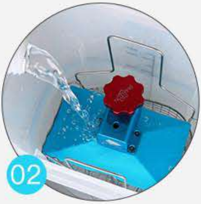


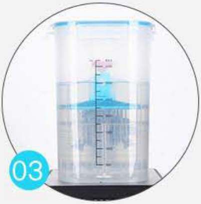




Just mount the Photon/Photon s build plate on to avoid direct contact to uncured resin







2 Enclosed washing

Prevents cleaning agent from splashing, more safety and protection.

Curing Mode

1 UV lamp beads upgrade ⇧

Lenses are added to the UV lamp beads, so UV light distribution is more uniform, model surface will cure more smoothly.

Wash&Cure 2.0

2 Rotating curing platform

The platform rotates 360°to ensure even and complete curing.
By adding a reflector, the top of the model can be cured.
